EXPERIENCE

- Software Development Intern** Feb. 2026 – Ongoing
Kodnest Technologies Bengaluru, Karnataka
- Gained hands-on experience in **Java, Frontend development and backend development** while contributing to real-world software projects.
 - Developed and strengthened practical skills in **full-stack development** through industry-oriented tasks and projects.

EDUCATION

- S.G. Balekundri Institute of Technology** Nov. 2022 – Jul. 2026
Bachelor of Engineering in Electronics and Communication Engineering Belagavi, Karnataka
- **CGPA:** 8.86
- KLE Independent PU College** 2018 – 2020
Pre-University Course (PCMB) Belagavi, Karnataka
- Rashtrottana Vidya Kendra** 2018
Secondary Education (10th Grade), CBSE Dharwad, Karnataka

PROJECTS

- FilmBox – Movie Recommendation Platform** GitHub JavaScript, React.js, REST API
- Developed a responsive movie discovery platform with a modern interface for browsing and discovering movies
 - Integrated a movie REST API to implement movie search, trailer streaming, and detailed movie information
 - Implemented personalized movie recommendations based on user preferences to improve content discovery
- TaskMint – Task Management Application** GitHub JavaScript, React.js
- Developed a task management application for efficiently organizing and tracking daily tasks
 - Implemented task creation, editing, categorization, priority-based organization, and completion tracking
 - Designed a responsive and user-friendly interface to simplify task management and improve productivity
- Simon Says – Memory Game** GitHub HTML5, CSS3, JavaScript
- Developed an interactive browser-based memory game featuring progressively increasing color sequences using JavaScript
 - Implemented random sequence generation, level progression, score tracking, and game-over functionality
 - Added Local Storage for persistent high scores along with responsive design and mobile touch support
- LoRa-Based EnviRover** GitHub ESP32, LoRa, IoT
- Developed an IoT-based environmental monitoring rover using ESP32 and LoRa for long-range wireless communication
 - Integrated DHT22, MQ-2, LDR, and ESP32-CAM sensors for environmental data collection and image capture
 - Enabled real-time monitoring by transmitting sensor data to Blynk with dynamic data visualization

TECHNICAL SKILLS

Languages : Java, SQL, JavaScript, HTML5, CSS3
Frameworks & Libraries : React.js, Node.js, Express.js
Backend & APIs : JDBC, RESTful APIs, MongoDB
Developer Tools : Git, GitHub, Visual Studio Code, Antigravity, Cursor
